STATEMENT OF WORK

In an effort to keep up with the data requirements of the District, the Central Consolidated School District (CCSD) Technology Department is requesting proposals to install new cable runs for new Access Points (APs) across the district. The purpose of this project is to meet the data requirements of the district. The installation of cabling will involve running cables from the classrooms/offices to the Main Distribution Frame (MDF) or Intermediate Distribution Frames (IDFs). Additionally, it is proposed that a refresh of access points is conducted in the district, with an expected total of 626 access points, subject to a margin of plus or minus 50. It should be noted that the cabling distance from a classroom could range between 1 to 100 meters (328 feet). The project may also require the installation of additional patch panels in our MDF/IDFs, as needed. The installation of new Access Points will include removal of old APs from their current locations, as well as installation and configuration of the Cloud Management System to manage all new Access Points in the district.

Summary:

Below are more detailed descriptions for the projects and the underlying requirements of each project. Please note the quantities and locations are the district's best estimates, but the district reserves the right to increase or decrease the quantities of equipment and locations. In compliance with FCC rules, the district is willing to consider equivalent equipment for all projects. Vendors bidding an alternative solution should provide documentation to demonstrate the equivalency of the proposed solution. CCSD will be the arbiter of whether the proposed solution is functionally and technically equivalent to the requested solution. The successful Offeror may only bill for the CCSD equipment installation and/or vendor purchased equipment that is installed at each location.

Appendix A_CCSD Sites and pricing Sheet includes a tab labeled "Sites" which includes each site name, location, and estimated quantity of APs and drops. There is also a pricing sheet tab for each project; "Project 1 - Cabling", and "Project 2 -Wireless", where vendors will enter all cost information, and this is the only location within the RFP where pricing information should be included. For ease of evaluation and to simplify the RFP response, the district is only asking vendors to provide unit costs for specific models, installation cost per device, and configuration cost per device. The cost proposal MUST include all costs, excluding taxes, associated with delivering and installing the requested products and services, which includes, but is not limited to, electronics, licensing, installation, permits, bid bond costs, equipment disposal costs, overhead, and any other direct or indirect costs.

The "CCSD Network Maps" attachment shows the estimated number of drops and APs needed at each location, the locations of the MDF and/or IDF, etc.

The district reserves the right to request a detailed breakdown of the costs during the invoicing process. Vendors must pass any manufacturer discounts on to the district. The vendor will not invoice and the district will not pay any charges in excess of the unit costs listed in the pricing sheet. Invoices from the successful offeror must clearly identify the quantity for each item and unit cost for each piece of electronics included in the proposal.

An individual school may be included in more than one project. In order to reduce interruptions to business operations the district expects to complete all projects at a specific school at the same time. The district believes this should also reduce the installation costs and vendors should take this into account when providing unit pricing. The district does reserve the right to separate the projects at a specific school on a case by case basis.

The district will be requesting E-rate funding for this project and the district expects to receive an 85% discount from the E-rate program for eligible goods and services. The completion of these projects is contingent on receipt of E-rate funding.

In accordance with FCC rules, the installation cannot be started until April 1, 2024 and must be completed no later than September 30, 2025. The district desires the work to be completed as soon as reasonably possible and Offerors should provide a schedule indicating how many schools will be completed each month. Offers will be evaluated based on the proposed schedule and any documentation the vendor provides to demonstrate it has a history of completing projects on schedule and under budget.

As required by Section 54.500(f) of Part 47 of the Code of Federal Regulation all offers in response to this RFP must offer the lowest corresponding price (LCP) which is defined as the lowest price that a service provider charges to nonresidential customers who are similarly situated to a particular E-rate applicant (school, library, or consortium) for similar services. See <https://www.usac.org/e-rate/service-providers/step-2-responding-to-bids/lowest-corresponding-price/> for more information on the requirements relating to LCP.

By submitting a proposal on the requested services herein, the vendor certifies its proposed services and/or products comply with Part 47 Section 54.9 and 54.10 of the FCC rules which prohibits the sale, provision, maintenance, modification, or other support of equipment or services provided or manufactured by Huawei, ZTE, or any other covered company posing a national security threat to the integrity of communications networks or the communications supply chain. See <https://www.usac.org/about/reports-orders/supply-chain/> for more details.

It is expected that the majority of the requested products will be fully eligible for support, but it is possible that some products are ineligible or partially eligible. Vendors are encouraged to review the Funding Year 2024 Eligible Services List (DA 3-1171A1) available at <https://docs.fcc.gov/public/attachments/DA-23-1171A1.pdf>

To qualify and be eligible for selection as a successful bidder under this RFP, the vendor must:

- Have or apply for a Service Provider Identification Number (SPIN) and provide it with the proposal.
- Agree that the school district's portion of the contract is subject to the availability of E-rate discounts to the school district on a year-by-year basis.
- Separate ineligible services and equipment from eligible services and equipment and include start and completion dates for the work on each invoice.
- Agree to invoice USAC for the contracted eligible amount using USAC's forms and procedures, if the district requests.
- Agree to invoice CCSD the contracted amount for services.
- Agree to assist the CCSD in resolving administrative issues that arise from the Universal Service program.
- Provide an FCC Registration Number (FRN) and proof of Green Light Status from the FCC. Any potential bidder found to be in Red-Light Status may be disqualified from participation in the bidding process and may be considered non-responsive.
