

1 Communicable Diseases

2  
3 *Note: For purposes of this policy, the term “communicable disease” refers to the diseases*  
4 *identified in 16.28.202, ARM, Reportable Diseases, with the exception of common colds and flu.*  
5

6 In all proceedings related to this policy, the District will respect a student’s right to privacy.  
7 Although the District is required to provide educational services to all school-age children who  
8 reside within its boundaries, it may deny attendance at school to any child diagnosed as having a  
9 communicable disease that could make a child’s attendance harmful to the welfare of other  
10 students. The District also may deny attendance to a child with suppressed immunity in order to  
11 protect the welfare of that child when others in a school have an infectious disease, which,  
12 although not normally life threatening, could be life threatening to a child with suppressed  
13 immunity.  
14

15 The Board recognizes that communicable diseases that may afflict students range from common  
16 childhood diseases, acute and short-term in nature, to chronic, life-threatening diseases such as  
17 human immunodeficiency virus (HIV) infection. The District will rely on advice of the public  
18 health and medical communities in assessing the risk of transmission of various communicable  
19 diseases to determine how best to protect the health of both students and staff.  
20

21 The District will manage common communicable diseases in accordance with Montana  
22 Department of Health guidelines and communicable diseases control rules. The District may  
23 temporarily exclude from school attendance a student who exhibits symptoms of a  
24 communicable disease that is readily transmitted in a school setting.  
25

26 Students who complain of illness at school may be referred to a school nurse or other responsible  
27 person designated by the Board and may be sent home as soon as a parent or person designated  
28 on a student’s emergency medical authorization form has been notified. The District reserves the  
29 right to require a statement from a student’s primary care provider authorizing a student’s return  
30 to school.  
31

32 When information is received by a staff member or a volunteer that a student is afflicted with a  
33 serious communicable disease, a staff member or volunteer will promptly notify a school nurse  
34 or other responsible person designated by the Board to determine appropriate measures to be  
35 taken to protect student and staff health and safety. A school nurse or other responsible person  
36 designated by the Board, after consultation with and on advice of public health officials, will  
37 determine which additional staff members, if any, have need to know of the affected student’s  
38 condition.  
39

40 Only those persons with direct responsibility for the care of a student or for determining  
41 appropriate educational accommodation will be informed of the specific nature of a condition, if  
42 it is determined that such individuals need to know this information.  
43  
44  
45

## Jefferson High School District #1

### STUDENTS

3417

Page 2 of 2

1 The District may notify parents of other children attending a school that their children have been  
2 exposed to a communicable disease without identifying the particular student who has the  
3 disease.
