

**PERSONNEL**

1 Prevention of Disease Transmission

2

3 All District personnel will be advised of routine procedures to follow in handling body fluids.  
4 These procedures, developed in consultation with public health and medical personnel, will  
5 provide simple and effective precautions against transmission of diseases to persons exposed to  
6 the blood or body fluids of another. The procedures will follow standard health and safety  
7 practices. No distinction will be made between body fluids from individuals with a known  
8 disease or infection and from individuals without symptoms or with an undiagnosed disease.

9

10 The District will provide training on procedures on a regular basis. Appropriate supplies will be  
11 available to all personnel, including those involved in transportation and custodial services.
