

Hello 4th graders and families! Here is a list of the work that you are being asked to do for Week Seven. You will need access to Google Classroom this week.

Please see the information sheet that was in the Yellow Envelope you picked up during Week One or message me on Remind or send me an e-mail if you need help getting logged on.

The math work and teaching materials for the week will be posted on Monday in Google Classroom. You will find teaching videos to go over the lesson material.

The only material that needs to be submitted for me each week is the Problem Solving Assignment. I automatically receive their IXL scores as they complete the 2 lessons for the week. I will be available online each day to provide support and answer questions for the students.

*****Important Announcement ... If you are participating in Math Camp-In, you will not be required to complete the math lessons below. Math Camp-In problems will count as your math work for the week. Please make sure to log into the Math Camp-In Google Classroom to share your work with the group.**

Week Seven Math Focus: Money

- Lesson 12.9 “Money: Making Transactions”, pgs. 458-459
- Lesson 12.10 “Money: Calculating Change”, pgs. 460-461
- Problem Solving Assignment on Google Classroom
- IXL M.7 – Find the Change, Price, or Amount Paid
- IXL M.8 – Price Lists with Addition and Subtraction

When you finish this week’s math lessons, you are officially finished with the Stepping Stones book for the year. We will be doing some review math activities during the next few weeks.

If you would like extra work for the week, here are some opportunities in addition to the activities the students have received in their weekly letters.

Stepping Stones has started an “Origo at Home” program with a set of weekly activities to continue math learning. The website is <https://www.origoeducation.com/athome/> and I have provided a link on Google Classroom.

You are welcome to work on any lessons on IXL, work on Redbird, or play a math game on ABCya

You can also go back and do any Stepping Stones lessons or pages that we didn’t do. I know there were some lessons and extra work pages that we skipped this year.

Week Seven Science Focus: What is Your Favorite Animal? and a Virtual Zoo Visit

This week you will get to do an independent research project on an animal of your choice. This gives you some control over what you study and lets you research an animal that interests you. We will start our week out with a read aloud. I will post a video of a read aloud of one of my favorite animal books, [Animals Nobody Loves](#) by Seymour Simon. After watching the video, you will have a chance to vote on which of the creatures in the book was your favorite.

Then it is off on a virtual field trip to the San Diego Zoo. Finally, you will learn about a Zoo Chef who works at our very own Columbus Zoo. Your science project for the week is to pick an animal of your choice and to create a Google Slide Show. For the week you will have three assignments. These can be found on Google Classroom. They will all four be posted on Monday and you can work on them all week.

- 1) Take a virtual visit to the San Diego Zoo. You should visit at least 3 exhibits.
- 2) Research your favorite animal online. You can search on EPIC for books about the animal of your choice. We also have free access to the website www.facts4me.com which has articles on different types of animals. The log-in information is **username: learn** and **password: read**. The "Facts4Me" link is on my Tizmos page. Then create a Google Slide show on your favorite animal. I have sent you a slide show, but you can change it any way that you want. Share facts about your animal.
- 3) Follow the link to the article about the Zoo Chef. There is even a video with the article that you can watch. After reading the article, you will need to answer the question about the "Coolest Zoo Job" and turn it in to me.

Don't forget to keep working on your Acts of Kindness around the house and for your family. I have gotten a couple of letters from some of you and it has really made me smile! If you do an Act of Kindness, share it with me. If you haven't used your e-mail, it is an easy way to share things with me. You all have your own e-mail and you can find it in your apps. Your e-mail address is your Google log-in.

If you have any questions as we go through Week Seven, please feel free to contact me. As always, I'm here to help in any way that you need. I miss you all and I hope you are staying safe. Enjoy the sunshine and be helpful!

Mrs. McKibben
