

"Exposure from a young age to the realities of the world
is a super big thing!" -Bill Gates

Logan Elm students gain real world exposure through many different options and opportunities offered, preparing them for the next steps in life.

Students are exposed to possibilities in the manufacturing industry.

Former LE grad and current president and CEO of the National Association of Manufacturer's visited the Logan Elm campus and spoke with students.

Distinguished Logan Elm alumni, Jay Timmons, was visiting Circleville to promote "Creators Wanted," a traveling campaign to promote careers within the manufacturing industry. This campaign has been traveling the U.S. for three years, with its final stop at the Circleville Pumpkin Show.

Along with Mr. Timmons, representatives from Sofidel and LG/Honda toured the new building and were pleased with the exposure to science and technology the students are receiving.

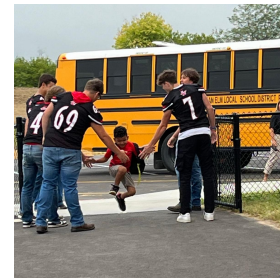

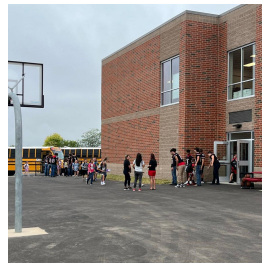

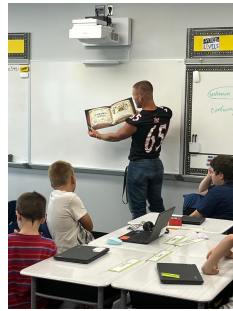

After the tour, some students from the junior and senior classes joined the group for a Q&A session. The panel gave the students insight on how to get started in the manufacturing industry and what the future looked like for jobs in manufacturing.

This was a great experience for the students of Logan Elm to gain exposure to opportunities in life after graduation.

"We learn simply by the exposure of living, and what we learn most natively is the tradition in which we live" -David P. Gardner, emeritus president of U. of California

High school football players, members of the band and cheerleaders took time from their mornings during the season to interact with the elementary students to raise school spirit and have fun with their fellow Braves.

STEAM classes expose students to life and classroom skills.

Staff article written and shared by Lindi Ross - STEAM teacher

STEAM (Science, Technology, Engineering, Art, Math) is a new class for our K-5 students. In this class students practice soft skills like working in groups, sharing, and problem solving. They have used these skill sets to build various structures and mazes using Legos, Plus-Plus blocks, and planks. Third graders finished a whole unit on bridges while other classes looked at strength, height, and length. All classes have been working on their technology skills as well.

K-5 students have been working on a coding/robotics unit. Kindergarten started with putting together puzzles since they use Huey robots to code pathways for their robots to travel. First, second and third graders have been using Sphero Indi robots to practice their coding skills. Fourth and fifth graders took on the responsibility of testing all robots and evaluating their capabilities for the lower grades. Fourth graders also took on the task of making robotic hands using everyday materials. Fifth graders will be making bristle bots in the upcoming month.

Future projects include a school wide flight unit with each grade level focusing on a specific topic.

FFA students gain exposure to community and competition.

Student article written and shared by Jackson Fox - 11th grade

On September 7th, the FFA Farm to Plate was held. It was held at the Pickaway Agriculture and Event Center. This event's goal is to raise money for the FFA and serve our community. Logan Elm, Circleville, Westfall and Teays Valley FFA chapters were in attendance and worked together to serve the community. At the event the members set up tables, served the guests drinks and food, and helped with anything that was needed. In total there were 65 FFA members present.

4th grade AG day was held on September 29th. 4th grade AG day is a day where 4th graders come to the Pickaway Agriculture and Event Center and learn all about AG. For this event we split it into two days. The chapters of Teays Valley and Westfall held their 4th grade AG day on the 28th. The Chapters of Logan Elm and Circleville held ours on the 29th. At the event we had stations. The stations Logan Elm were in charge of were machinery, pollinators, animals, and guides. The 4th graders got to see and learn things though Logan Elm such as Bee Keeping, different kinds of animals and different types of machinery.

Our Equine team got to attend the Quarter Horse Congress in Columbus. They got to practice judging at one of the largest horse shows around. Overall Logan Elm has been striving and working hard for our community.

**Congratulations to all students
who participated in extra-
curriculars on a successful fall
season!**

2023-24 School Calendar:

upcoming events:

November 22-27: Thanksgiving Break
November 28: School Resumes
December 12: High School Choir Concert
December 14: High School Band Concert
December 22-January 2: Winter Break
January 3, 2024: School Resumes

For full calendar of events, please visit loganelm.org.

Thank You!

We appreciate your interest in the students and activities of all Logan Elm schools!
