

## **COVID19 TESTING**

The NY State Department of Health guidance serves as the mandatory base safety protocols for school districts to follow. Testing is part of a continuum that includes mandatory daily screening, testing for symptomatic individuals contact tracing in the event of a positive case.

The district has a plan in place in which any positive cases will be tracked through contact tracing protocols and in coordination with the local health department.

If anyone has or is suspected of having COVID-19 symptoms, they will be referred to their primary care physician, urgent care center or the Delaware County Department of Health directed to a testing site.

In the event that a large-scale testing will need to be conducted at the school, the school administration will work with the Delaware County Department of Health and

The district will consult and work closely with the Delaware County Department of Health on a case by case basis.
