

Each area league recently voted on the decision of whether or not to participate in winter sports. Although this was a tough decision, they could only rely on guidance from their local DOH. Unfortunately, most of the area school districts cannot meet the advised protocols, that would be necessary, to keep students safe. I want to assure each and every one our parents and athletes that the CVCS athletic department, coaches, administration and Board of Education did everything possible to persuade the Delaware League that we could meet these protocols. Due to the aforementioned reasons, we won't be able to participate in athletics for the Winter and Fall 2 seasons.

The DOH's specific protocols of less than a 4% seven day rolling average positivity rate, and other frameworks, were too much to overcome for a majority of our member schools. We empathize with every school and community that had to make this decision which breaks the hearts of our student athletes. It truly saddens every single one of us.

The DOH guidance can be found on our website and also on the Delaware County Department of Health's website. It will give important information about the COVID areas and the protocols that were used in the decision making process. We are located in the Capital Region zone, which canvases 15-20 counties and county health departments.

We will make every effort to make spring sports a reality and explore an independent schedule for Fall 2 . If you have any questions or valid concerns, please call Mr. Harter or Mr. Weston. Again, we are truly sorry that we couldn't make it happen for our student athletes.
