

Resources for teachers, students and parents to enhance learning.

Curiosity Stream is a factual magazine that carries non-fiction documentaries if you are looking for reliable information for high school students. They do charge but it is a minimal amount and they are running a sale right now. They have thousands of videos and have one right now about Covid-19.

Brainzy is a free resource for elementary students to practice math, reading and writing and typing skills. Register as a guest and choose the grade level. They will read a book to you and have activities to go with them. You can practice typing, choose the skill you want to practice and have fun. If you sign in as a guest they don't register points but I believe it is easy to register. Have fun!

Scholastic Teaching resources links are divided into grade levels. Prek - Kinder, 1st - 2nd, 3-5, and 6-9. With links for teachers, parents and students, there is a lot of information here. They have fun activities such as Dogman activities and articles about animals and news events geared towards specific age groups.
