# Section 1: Introduction

## Remote Learning Operating Principles

---

- ❑ Local pandemic conditions may determine or alter the mode of instruction throughout the school year and dictate that learning is completed remotely. In the event the District is forced into a remote learning situation, each student will experience a learning opportunity supported by a teacher who is in a different location.
- ❑ Our goal is to be ready at a moment's notice to provide continuous instruction to our students under any conditions and to support the academic, social, emotional and physical needs of our students even though school buildings are closed.
- ❑ Remote learning does not just mean online learning. Technology certainly is a supportive tool for remote learning, but powerful remote learning can occur through thoughtful offline lessons that encourage students to explore the natural world and engage in interdisciplinary and artistic hands-on learning.
- ❑ Remote learning plans should not necessarily replicate a traditional school day—especially with regard to the daily schedule and timetable.
